

**2020 WORKING GROUP ON CONTINGENT-OWNED EQUIPMENT
TRIENNIEL REVIEW OF REIMBURSEMENT RATES
NATIONAL COST DATA**

ANNEX C – MEDICAL SUPPORT SERVICES

Guidelines for submission of cost data

In its resolution 59/298, the General Assembly endorsed the observation of Advisory Committee on Administrative and Budgetary Questions (ACABQ), in paragraph 13 of its report A/59/708, that “*The Working Group recognized that the modular support concept provides flexibility and the ability to build a more efficient, effective and responsive medical facility to meet the specific needs of peacekeeping missions*” Over the years, the General Assembly revised the rates for medical equipment and self-sustainment and decided that the future reviews should be conducted in the form of a comprehensive review using data provided by troop/police contributors (T/PCCs).

To facilitate the review of reimbursement rates at the 2020 Contingent-Owned Equipment (COE) Working Group, Member States are requested to submit national cost data using 2018 as base year in tabs 2 through 7 of this Annex. To assist the Secretariat in the consolidation of the spreadsheets, it would be appreciated if all national costs could be provided in **US dollars**.

It should be noted that the pre-deployment medical costs incurred by TCCs are now included as part of the single standard personnel reimbursement rate and should not be reflected in this Annex

Please note this Annex contains the following tabs:

- **Tab1:** Instructions (current tab)
 - **Tab2:** National Cost Data - Medical
 - **Tab3:** Level I Clinic
 - **Tab 4:** Level II Hospital
 - **Tab 5:** Level III Hospital
 - **Tab 6:** Miscellaneous
 - **Tab 7:** Pharmaceuticals
- On the National Cost Data– Medical (tab 2), Member States are requested to provide medical self-sustainment national cost per person per month. The national cost should be based on the average cost over a six-month period. *(please make sure to fill in columns b, c, d and e).*
 - The Clinic (Level I) and Hospital (Levels II & III) worksheets (tabs 3, 4 and 5), specify the equipment requirements as approved by the 2017 COE Working Group. Each facility has been divided into functional components to reflect a medical “capability” and allow for potential

modular configuration. There is provision within the worksheets for Member States to indicate multiple functionalities/modules within a facility and to provide costs for similar or substitute items. *(please make sure to fill in columns b and c)*

- A Miscellaneous worksheet (tab 6) is included to allow Member States to provide the cost of any additional capabilities which may be available. *(please make sure to fill in columns b and c, as well as national cost data for Gynaecology module, Orthopaedic module, Physiotherapy module, and fee for service schedule)*
- Under the tab “Pharmaceutical” worksheet (**tab 7**), a list of basic products is provided. Member States may wish to compile a pharmaceutical list for six months for each medical facility: Levels I, II and III. If Member States have provided additional pharmaceutical items, those could be added by class. The total cost of pharmaceutical products should be used to provide the national cost per person per month in various levels of medical facilities in United Nations peacekeeping missions. *(please make sure to fill in columns b and c).*

It is requested that Member States do not leave any field blank and indicate either the national cost for the equipment or if the equipment is not available in the national inventory, to mark not available (N/A).

Member States have the option to use the current COE Manual cost data for any unfilled fields in the declaration form attached the package.

Finally, when filling the templates in the following tabs, Member States should refer to Chapter 3, annex C of the COE Manual on the performance standards for medical support.
