

**2020 WORKING GROUP ON CONTINGENT-OWNED EQUIPMENT
TRIENNIEL REVIEW OF REIMBURSEMENT RATES**

NATIONAL COST DATA

ANNEX D – SPECIAL CASE EQUIPMENT

Guidelines for submission of cost data

The Phase V Working Group, in paragraph 29 of its report A/C.5/54/49, stated that for the Contingent-Owned Equipment (COE) reimbursement system to be robust, it must take into account the special cases that arise between the periodic reviews and established a format for submission of national cost for special cases. As defined in chapter 2 of the COE Manual (1/72/288), special case equipment is major equipment for which, because of the uniqueness of the item, its high value or lack of a generic group, as standard rate of reimbursement has not been defined in tables of reimbursement (i.e. in Chapter 8, Annex a of the COE Manual).

Phase V also recommended that the Secretariat provide relevant details of those special case equipment that may have arisen between reviews to Member States at least six months before the review. For this purpose, the Advisory Committee on Administrative and Budgetary Questions stated in paragraph 11 of its report A/59/708, that the Secretariat should be mandated to maintain a database of special cases to assist in future reviews. Tab 3 of this Annex contains “Current Special Cases” a list of the special cases equipment in the Secretariat database as of May 2018. An updated list of special case equipment will be shared with Member States prior to the meetings of the 2020 COE Working Group.

Member States are requested to collect national cost data on special case equipment using 2018 as the base year to complete the National Cost Data in tab 2 of this Annex. To assist the Secretariat in the consolidation of the spreadsheets, it would be appreciated if all national costs could be provided in US dollars.

Member States are requested to use the template in tab 2 to provide the national data for special case equipment tab as follows:

Please enter the name of the Member State on top of the template.

- **Column (a)** - Category of Equipment: please enter the description of the major equipment as per the special cases list contained in tab 3 of this Annex D
- **Column (b)** - National Description: please enter the national terminology for specific major equipment. (N.B. Some Member States in the past have listed the name of the manufacturer and the model number of the equipment).
- **Column (c)** - Usage Type: Please further define the equipment. For example:

Category of Equipment	National Description	Usage type
Firefighting Truck	Crash Fire Rescue 6000 L Water Foam	AIRFD FF Truck
Demining Vehicle	Leo C2 Tank	Leo with Plow/Roller
Main battle tank, heavy	M88	Recovery

- **Column (d)** - National Purchase Price plus upgrades: please enter the initial purchase price of the equipment plus any major capital improvements.
- **Column (e)** - National Price Adjustment: please indicate the national inflation adjustment, if any, as well as discounts for any prior usage (e.g. depreciation for each year that the equipment is used for national service).
- **Column (f)** - National Market Value: Please enter the total value of columns (d) and (e) or the replacement value of the equipment, whichever is less.
- **Column (g)** - National estimated useful life: please enter the estimated useful life of the major equipment.
- **Columns (h) and (i)**: please enter the average monthly cost of maintenance and petrol, oil and lubricants (POL). Please indicate the basis of monthly maintenance cost: (1) by kilometer or (2) by hour.
(N.B. the two columns apply only to vehicles. Normally the United Nations provides POL in the mission area).
- **Column (j)**: Please enter the monthly maintained rate of all non-vehicle equipment.

It is requested that Member States do not leave any field blank and indicate either the national cost for the equipment or if the equipment is not available in the national inventory to mark not available (N/A).

Member States have the option to use the current COE Manual cost data for any unfilled fields in the Decision form attached in the Appendix to this package.

**2020 WORKING GROUP ON CONTINGENT-OWNED EQUIPMENT
 COST DATA FOR MAJOR EQUIPMENT IDENTIFIED AS "SPECIAL CASE EQUIPMENT"
 DATA IN SECRETARIAT DATA BASE ON SPECIAL CASE EQUIPMENT AS OF 18 MAY 2018**
