

UN Triangular Partnership Programme (TPP)

Strengthening global peace operations through practical training, innovation, and cross-national cooperation.

What is TPP?

TPP is a United Nations initiative that builds the operational capacity of uniformed peacekeepers and African Union personnel in four critical areas: **engineering, medical, and C4ISR, and telemedicine.**

By connecting **troop-contributing countries, supporting Member States, and the UN Secretariat**, TPP enables faster, safer, and more capable peace operations.

Why It Matters

Trains peacekeepers to meet today's complex field challenges.

Builds national & regional training capacity (TOT).

Enhances safety, medical response, and tech readiness.

Supports the Action for Peacekeeping (A4P & A4P+).

Key Achievements (as of 30 June 2025)

29,000+

Military & police personnel trained in tech & C4ISR

1,200+

Engineers trained across 8 host countries

6+

Field missions using TPP telemedicine

327

Medical trainees and 76 certified trainers

324

Female tech officers trained across 75 countries

42

Member States supporting via funding, facilities, or expertise etc.

Our Areas of Work

ENGINEERING

HEE operators/TOT, maintenance, engineering project management

MEDICAL

FMAC (field medical assistants)/TOT

C4ISR

Micro-UAS ops/TOT, Unite Aware, women's outreach, comms & info

TELEMEDICINE

Real-time remote medical support, telemonitoring and surgical guidance

TPP Pillar Highlights

ENGINEERING

- 1,205 trained personnel since 2015 across 3 continents.
- Courses hosted in Kenya, Morocco, Rwanda, Uganda, Cambodia, Indonesia, Viet Nam, and Brazil.
- TOTs and equipment-sharing to build local capacity.

MEDICAL

- 327 peacekeepers trained in Field Medical Assistants Courses (FMAC).
- Modular TOT enabling TCCs to run their own courses.

C4ISR *(via the UN C4ISR Academy for Peace Operations (UNCAP))*

- 29,000+ personnel trained from 152 countries.
- M-UAS operator and Women's Outreach Courses rolled out globally.
- Mobile Training Teams deployed to missions for real-time tech needs.

TELEMEDICINE

- Tele-expertise across 30+ sites in 9 UN missions since 2022.
- Pilot projects in remote surgical guidance & cross-border telemedicine.
- Winner of the 2023 UN Secretary-General Award.

Innovating Peacekeeping Training

TPP is at the forefront
of modernising peace
operations by:

Launching integrated training
across pillars
(engineering/medical + C-IED).

Collaborating with UNMAS in C-
IED area (cross-pillar training, All
Arms Search Course (AASC)).

Adapting environmental
management into mission design
planning with Env Section.

Expanding training to AU Peace
Support Operations (PSOs).

Offering e-learning models for
broader global access with CDOTS
support

Support the Mission *Member States can contribute through:*

Funding

(one-off or multi-
year support)

In-kind contributions

(equipment, facilities)

Expertise

(trainers, curriculum)

Partnerships

with host or troop-
contributing countries

*Build Capacities, Foster Partnerships, and
Secure Lasting Peace.*
