

## **KINGDOM OF MOROCCO**

# **TYPES OF INSPECTIONS IN THE VERIFICATION PROCESS**

### **1. ISSUE PAPER THEME:** Self-Sustainment

### **2. SUMMARY**

The verification takes three forms inspections at three separate stages: arrival, operational readiness inspection (ORI) and departure inspection. However, the quarterly inspection is included in the COE Manuel under "other verification and reporting".

### **3. BACKGROUND**

*-COE 2020, chapter 3, paragraphe VI, pages 26-27*

*-UN resolution N°74/279 du 30 juin 2020.*

### **4. DETAILED PROPOSAL**

Include under a separate paragraph a definition of the quarterly inspection for a better understanding of the manual.

The proposed definition is:

**Periodic Inspections are conducted for COE verification on a quarterly basis in conformity with the Verification Reporting Cycle outlined by UNHQ to assess the status of Major Equipment and Self-Sustainment categories. They constitute the source for creation of the Periodic Verification Reports which are the principal documents for reimbursement of Major Equipment and Self-Sustainment.**
